TITLE : PRODUCTION OF SILICONE
RESIN-METAL COMPOSITE

A-A

ABSTRACT : PROBLEM TO BE SOLVED: To accurately and efficiently produce a metal composite having silicone resin layers provided on both surfaces thereof.

SOLUTION: In a silicone resin-metal composite manufacturing method forming silicone resin layers on both surfaces of a thin metal plate 2 by an injection molding method, through-holes 3 are provided to the peripheral edge part of the thin metal plate 2 arranged in a mold cavity and a silicone resin is injected from the single sides of the silicone resin layers to be formed and the mold cavity is filled with the resin through the through-holes 3 to form the silicone resin layers on both surfaces of the thin metal plate 2.
